DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 15th, 2006 has been entered.

Response to Arguments

2. Applicant's arguments with respect to claims 27-31 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1, 9, 18, 20 and 25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant recites the phrase "less than at least about" which does not limit any value that may follow.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1, 3, 4, 9, 10, 12, 18-21, 25-27 are rejected under 35 U.S.C. 102(e) as being anticipated by Glick et al (U.S. Patent Number 7,018,409).
7. Glick et al. discloses an intraocular lens (IOL) comprising an inner zone having a first optical power and an intermediate zone with a second optical power and a third zone having a power different from the second zone. The IOL as disclosed by Glick et al. progressively varies power from the center to the periphery thereby creating essentially infinite amounts of zones. Furthermore, Glick et al. discloses a range of 0 diopters at the optical axis to 1.5 diopters at the periphery allowing two separate zone to be defined with a difference in magnitude of 0.65 diopters. (col. 5, lines 5-8)
- Finally, Glick et al. discloses an IOL comprising a spherical portion at the center of the lens with an aspheric portion at the periphery (col. 2, lines 63-67; col. 3, line 1) and an IOL which compensates for shifts in IOL position due to postoperative changes (col. 4, lines 47-48).

Allowable Subject Matter

8. Claims 22-24 are allowable over the prior art of record.

Art Unit: 3738

9. Claims 2, 5-8, 11, 13-17 and 28-31 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
